CONTROL STICK FUNCTION

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional Control Pad. When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding down the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center.

EYE OF INVISIBILITY

The eye will render its user invisible and undetectable by enemies. Lasts for a limited time.

MAP OF ELEMENTS

A Shaolin monk who journeyed deep into the Himalayan Mountains hundreds of years ago created this ancient map. It is believed that it leads the way to a great temple hidden in the mountains. The temple is said to be protected by four immortal guardians and holds treasures unseen by the eyes of mortal man.

SHINNOK'S AMULET

This amulet harnesses the four key elements that compose the nature of Earth. It was created by the former Elder God Shinnok and was used as a key for unbalancing the Earth's furies during his ancient battle with Earth's protector, Rayden.

COLD REGENERATOR

Sub-Zero is able to generate ice as cold as minus 500 degrees Fahrenheit by absorbing the surrounding air. But, he can deplete the air in his immediate area causing him to temporarily lose his ice generating abilities. Sometimes the air can regenerate in small fusion-like pockets known as Cold Regenerators, giving Sub-Zero the ability to harness it and quickly replenish his powers.

KEY ELEMENTS

The Temple of Elements consists of four separate areas. Each is representative of one of the four elemental properties of Earth. The properties are Wind, Earth, Water and Fire.

Each area also contains keys in the shape of three symbols. When each of these keys are found and used in their proper locations, they can act as keys to open doors or cause events that will assist in progressing through the temple. To activate a key, select it from the Health Status Screen and press the **USE BUTTON** to activate it.

WIND

EARTH

KEY ELEMENTS

The Netherealm - The regions of the Netherealm are largely uncharted. However, some information is known about a few locations and the various items needed to traverse their treacherous paths.

The Prison of Souls

Prior to Shinnok's reign as the ruler of the Netherealm, the prison was used to capture and torture the souls that were banished there.

Each Elevator Key Card gives access to one of three levels in the Prison of Souls. They are automatically activated when in possession and on a lifter. To operate a lifter - hold the **ACTION BUTTON** and press **HIGH KICK** to go up a level, **LOW PUNCH** to go down a level.

The Bridge of Immortality

Named after the Sea of Immortality that it crosses, the bridge exists as a battered remnant and constant reminder of Shinnok's war with the Netherealm's previous ruler. It connects the world's solid landmass with Shinnok's fortress. The only way to gain access into the fortress is to use all three keys simultaneously. Each key is held by one of the three bridge keepers. The keepers were created by Shinnok to do battle with his former enemies within the realm.

Shinnok's Fortress

There is no known information available concerning Shinnok's fortress....

THE QUEST

Lives Remaining

Health

Ice Meter

The main game screen displays your Health, an Ice Meter and the number of Lives remaining. Read the following information to familiarize yourself with each item on-screen:

Health

As you battle your way through each level, the Health of SUB-ZERO will diminish from green to grey, then red as you take on damage. As your condition turns critical, it's a good idea to press your **Z BUTTON** and boost your health using the Health Status Screen (see **HEALTH STATUS**, pg. 9). You can then return to the fight and continue your journey.

Ice Meter

When you've achieved enough Experience Points to give SUB-ZERO freeze powers, you can make use of the Ice Meter. As you use the ice against your opponents, the meter contents will diminish, then slowly rise again. You can replenish your ice faster by grabbing a Cold Regenerator when you see one (see **COLD REGENERATOR**, pg. 12).

Lives Remaining

As your journey begins, you can keep track of the amount of Lives you have remaining displayed in the upper left portion of the screen (i.e 3x, 2x, etc.).

MYTHOLOGIES

Over the millennia, the Netherrealm has had many rulers. Most of them were forged within its fiery pits, eventually ripping their masters mercilessly from their thrones. One however, came not from the bowels of the Netherrealm, but from the heavens of reality. He was the fallen Elder God known as Shinnok.

Upon entering the realm, Shinnok found himself immediately under attack by its then ruler Lucifer. He would exist tortured and tormented by the dregs of hell for thousands of years. Until he met Quan Chi.

Quan Chi is a free roaming sorcerer. That means that he can travel the various planes of reality without detection from their gods. It also means that over the years he has obtained great power. Aware of Shinnok's dilemma, Quan Chi traveled to the Netherrealm and made the fallen god an offer. He will free him from his confines and assist him in defeating Lucifer and his minions in exchange for power and the ability to rule at his side if and when he escapes the Netherrealm entirely. Shinnok agreed and the two waged a war in the Netherrealm that lasted for centuries. But, the ex-Elder God eventually won as he viciously slew his former master then took his seat as the new ruler supreme of the dead realm. Shinnok, however, had nothing to rule. The realm was a desolate wasteland of fire and brimstone inhabited by grotesque demons. So, he decided to create a physical world, trying his best to emulate the realm he wanted so badly... Earth.

God of Wind

MYTHOLOGIES

He took the demons of his realm and transformed them into as human a form as possible. But unlike the Outworld, which became a wasteland after Shao Kahn sapped its energies, the Netherrealm never was a living planet. It always will exist as a dead world. Its true form hidden by its ruler.

It was through the Mortal Kombat tournament that the Outworld's soul-stealing sorcerer Shang Tsung discovered the location of the sacred Map of Elements. After Goro, the reigning Outworld champion, defeated the original Kung Lao over 400 years ago, Shang Tsung sapped the human's soul. He retained his thoughts and memories thus discovering the secrets of the sacred map, which has been hidden within the Shaolin temples for centuries. These events enabled Shang Tsung to strike a bargain with Quan Chi.

In exchange for Shinnok's assistance in a plot to reincarnate the Outworld Emperor Shao Kahn's dead queen, Shang Tsung would reveal to Quan Chi the location of the map that would lead to Shinnok's sacred amulet. But, Shang Tsung failed to inform Quan Chi of the elemental guards that protect the amulet. Their mere existence makes it impossible for Quan Chi to enter the temple where the amulet rests. But, if he could get a human to enter, the right human, one who could perhaps defeat the elements...

God of Water

MYTHOLOGIES

Sub-Zero and The Lin Kuei

Somewhere in the northern most parts of Asia, there exists a secret clan of assassins and thieves known as the Lin Kuei. This group has existed for centuries and thrives on the evil intention of the people who pay for their services. Its warriors are chosen at birth to be raised apart from the workings of day to day civilization and are stripped of their former lives. Only the clan knows their existence. Each of them possesses certain skills and abilities that set them apart from normal men. These abilities are passed on from generation to generation and honed throughout the experiences of life.

Sub-Zero learned of his ability as a young adult. It was passed on to him by his father, a fourth generation Lin Kuei warrior himself. Among his first missions for the Lin Kuei, is one that leads him to the Shaolin Temples to steal the sacred Map of Elements.

God of Fire

MYTHOLOGIES

Scorpion and The Ninja

Spread throughout Japan, the Ninja exist as the Lin Kuei's Japanese counterpart. It is believed that a renegade, Japanese-born Lin Kuei warrior named Takeda developed the art of Ninjutsu hundreds of years ago. He returned to Japan to offer his services and knowledge to various lords and generals during that country's feudal period. Many of his skills and techniques were soon copied and learned throughout his homeland.

The Ninja have never existed as one collected clan. They work as a loosely connected spy network, made up of several small clans. One such clan is known as the Shirai Ryu. Their founder was Takeda himself, making the Shirai Ryu the very first ninja clan. This also made them instant foes of the Lin Kuei and made Takeda a target for assassination. But, he managed to elude his attackers until his elder years, when he died not from a vicious battle, but in his sleep - a victim of poison slipped into his tea. Scorpion is the code name for a modern day member of the Shirai Ryu named Hanzo Hasashi. His latest mission leads him into the heart of China, home of the rival Lin Kuei and location of the Shaolin temple where his mission is to steal the sacred Map of Elements.
